

WOOL CARBONIC

WOOL CARDING!
The undersigned will at a few days have ready his New Factory in operation in the Town of Belleville, on the site formerly occupied by Mr. Joseph Reed, where he will open a business with
Latest Improved Machinery.
He would say to all those who manufacture their wool, that he is prepared to do
CUSTOM CARDING!
In the best possible manner, and as follows:—The wool will be passed through the Carding Machine, winding it around a ball, and a certain amount is in the drum; a signal is given by the bell, it is then taken in the form of a sheet, and reversed, and the apron of the second Carding Machine is then put on, and the wool is given it a second carding makes an even mix. The manner

With his long experience in the business and the advantage of the latest improved machinery, he fancies that he will not fail to give the best satisfaction.

He would further call the attention of the public to his

DOMESTIC SPINNING

for the stable and speedy manner in which does its work. It will spin from 20 to 40 knots, and of roving 40 knots. It repeats the same without the roving and twist, this prevents cloth fraying in the fulling; it spins on the bobbins ready for the shuttle, reels, dobles, cones, and to suit warp or filling.

All necessary changes to spin fine counts, and to suit warp or filling.

The underlapper, all manufacturers use roving for customers, it is made by interlocking by steam and water power, so the threads will not prevent later from weaving six days in each week.

Ladies willing to purchase a Spinning
